## Why Fund Flow?

Fund Flow is an innovative business solution which takes care of all your accounting and finance needs. Businesses told us they wanted an integrated, hands-on service which would provide all of the benefits of an in-house accounting function with none of the hassle.

They also told us they wanted to be able to cherry pick the accounting, taxation, invoicing, payroll, auto-enrolment, and strategic financial planning functions they needed – a tailored solution – without paying the earth for it.

They also said that many outsourcing operations felt too distant and that they needed an accounting partner who would be with them every step of the way, ready to respond whenever there was a query or a need for additional support – to be just a phone call or email away and ready to jump into action.

Our response was to set up Fund Flow. We believe that if you are in business you should never expect too little, or settle for less.

# What can Fund Flow do for my business?

In a nutshell, Fund Flow can provide whatever you need. We work with you to provide a tailored service to meet your needs.

## We can take care of:

- Accounting year end
