

Our work with logistics companies

Keeping your business finances flowing smoothly

The team at Salhan Accountants are experienced in working with transport, distribution and logistics businesses of all sizes – from start-ups and owner-managed and family businesses, to growing SMEs and large companies.

No matter what size your business – we have an accountancy solution that's right for your needs.

Large logistics companies – £10million plus turnover

We serve a number of large national logistics companies. Some have in excess of 20 depots throughout the UK and operate a fleet of over 1,000 vehicles.

As Salhan 'Fundflow' clients, these businesses benefit from:

- Management accounts analysis
- Tax compliance
- Tax planning
- HMRC enquiries
- HR compliance – including payroll and pensions enrolment
- GDPR compliance
- Legal support (from our network of partners)

Medium-sized logistics companies – under £5million turnover

We're proud to work with a number of medium-sized operators that continue to thrive and grow.

As Salhan clients they have the potential to access Fundflow services and receive a tailor-made service at a highly competitive price.

This includes:

- Help and support with all compliance-related matters
- Access to all HR and GDPR services if required
- Excellent tax planning, advisory and tax litigation if required
- Legal support (from our network of partners)

Logistics companies with turnovers under £750,000

We understand that smaller logistics operators often don't have the time or resources to divert their energies from the main business in hand, to sort out the company's finances.

Salhan Accountants' accountancy, taxation and business services are ideal for growing businesses.

We provide cost-effective, day-to-day accountancy and compliance support, with the added reassurance of knowing help with tax litigation or HMRC enquiries, is only a phone call away if required.

Self-employed drivers

If you are a self-employed driver or sole owner operator, you don't have the time to sort out bookkeeping, annual returns and tax compliance issues.

You need to be out on the road, earning a living, rather than spending time filling out HMRC returns.

Our Salhan Connect service delivers a low cost, high quality accounts and financial service to small businesses, partnerships, sole traders and contractors.

This means we can help keep you on the straight and narrow. We'll make sure you are fully tax compliant, so that's one less thing to think about.
